Explanation/Reference:

Explanation:

The following are the purposes of audit records on an information system:

Troubleshooting

Investigation

An IT audit is the process of collecting and evaluating records of an organization's information systems, practices, and operations. The evaluation of records provides evidence to determine if the information systems are safeguarding assets, maintaining data integrity, and operating effectively and efficiently enough to achieve the organization's goals or objectives. These reviews may be performed in conjunction with a financial statement audit, internal audit, or other form of attestation engagement. Audit records are also used to troubleshoot system issues.

Answers A, B are incorrect. The audit records cannot be used for backup and upgradation purposes.
