Answer: B

NEW QUESTION: 3

You purchase a new Windows 10 Enterprise desktop computer. You have four external USB hard drives.

You want to create a single volume by using the four USB drives. You want the volume to be expandable, portable and resilient in the event of failure of an individual USB hard drive.

You need to create the required volume.

What should you do?

A. From Control Panel, create a new Storage Space across 4 USB hard drives. Set resiliency type to Parity.

B. From Disk Management, create a new spanned volume.

C. From Control Panel, create a new Storage Space across 4 USB hard drives. Set resiliency type to Three-way mirror.

D. From Disk Management, create a new striped volume.

Answer: A

Explanation:

Explanation

Storage Spaces can combine multiple hard drives into a single virtual drive. To create a storage space, you'll have to connect two or more additional internal or external drives to your computer to create a storage pool.

You can also specify an arbitrarily large logical size. When your existing drive begins to fill up and nears the physical limit, Windows will display a notification in the Action

Center, prompting you to add additional physical storage space. Selecting the Parity resiliency type allows Windows to store parity information with the data, thereby protecting you from a single drive failure.
