You can show all of the panels necessary to work with interactive [Practice AIF Test Engine](#) content by choosing Window > Workspace > Interactive or choosing Interactive from the workspace switcher in the Application bar.

Our AWS-Solutions-Associate VCE dumps will help you pass exams successfully, Our researchers and experts are working hard to develop the newest version of the AWS-Solutions-Associate learning guide.

In the same trade at the same time, our AWS-Solutions-Associate real study dumps have become a critically acclaimed enterprise,

so, if you are preparing for the exam qualification and obtain the corresponding certificate, so our company launched AWS-Solutions-Associate exam questions are the most reliable choice of you.

And according to your needs, you can make the most correct purchase decision without regretting, In case, you fail in the AWS-Solutions-Associate exam, you may think your money spent on AWS-Solutions-Associate real dumps is wasted, but Amazon is not that style.

Convenience of the online version of our AWS-Solutions-Associate study materials is mainly reflected in the following aspects: on the one hand, the online version is not limited to any equipment.

It has more possibility to do more things and get better position after qualified with the AWS Certified Solutions Architect - Associate (SAA-C02) certification, So Getting AWS-Solutions-Associate certification will become an important turning point in your life.

Highly-demanded AWS-Solutions-Associate Exam Materials Supply You Unparalleled Practice Prep - Business-First Some candidates may wonder that if the payment is quite complex and **Exam AWS-Solutions-Associate Papers** hard, in fact it is quite easy and simple, Also you can wait the updating or free change to other dumps if you have other test.

Facts prove that learning through practice is more beneficial for you to learn and test at the same time as well as find self-ability shortage in Amazon AWS-Solutions-Associate exam study guide.

Hence, the AWS-Solutions-Associate Exam Questions have been developed into a simple to understand language and in the shortest possible number of question, There are 24/7 customer **Exam AWS-Solutions-Associate Papers** assisting to support you when you have any questions about our AWS Certified Solutions Architect - Associate (SAA-C02) exam pdf.

Nowadays there is a growing tendency in getting a certificate, How can I register my software, The Business-First AWS-Solutions-Associate practice test software helps you to self-evaluate your learning what you have learnt.

Our AWS-Solutions-Associate exam braindumps have become a brand that is good enough to stand out in the market, Besides, there is no limitation of the number of you installed.

If you are determined to purchase our AWS-Solutions-Associate latest dumps materials, please prepare a credit card for payment, You do not need to worry about the new updates, because [AWS-Solutions-Associate](#) we will send the follow-up

materials to your mailbox lasting for one year.

**NEW QUESTION: 1**

The following is a network diagram for a project.

The free float for Activity H is how many days?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

**NEW QUESTION: 2**

Overview

General Overview

ADatum Corporation has offices in Miami and Montreal. The network contains a single Active Directory forest named adatum.com. The offices connect to each other by using a WAN link that has 5-ms latency.

A: Datum standardizes its database platform by using SQL Server 2014 Enterprise edition.

Databases

Each office contains databases named Sales, Inventory, Customers, Products, Personnel, and Dev.

Servers and databases are managed by a team of database administrators. Currently, all of the database administrators have the same level of permissions on all of the servers and all of the databases.

The Customers database contains two tables named Customers and Classifications.

The following graphic shows the relevant portions of the tables:

The following table shows the current data in the Classifications table:

The Inventory database is updated frequently.

The database is often used for reporting.

A full backup of the database currently takes three hours to complete.

Stored Procedures

A stored procedure named USP\_1 generates millions of rows of data for multiple reports. USP\_1 combines data from five different tables from the Sales and Customers databases in a table named Table1.

After Table1 is created, the reporting process reads data from Table1 sequentially several times. After the process is complete, Table1 is deleted.

A stored procedure named USP\_2 is used to generate a product list. The product list contains the names

of products grouped by category.

USP\_2 takes several minutes to run due to locks on the tables the procedure accesses. The locks are caused by USP\_1 and USP\_3.

A stored procedure named USP\_3 is used to update prices. USP\_3 is composed of several UPDATE statements called in sequence from within a transaction. Currently, if one of the UPDATE statements fails, the stored procedure fails. A stored procedure named USP\_4 calls stored procedures in the Sales, Customers, and Inventory databases.

The nested stored procedures read tables from the Sales, Customers, and Inventory databases. USP\_4 uses an EXECUTE AS clause.

All nested stored procedures handle errors by using structured exception handling. A stored procedure named USP\_5 calls several stored procedures in the same database. Security checks are performed each time USP\_5 calls a stored procedure.

You suspect that the security checks are slowing down the performance of USP\_5. All stored procedures accessed by user applications call nested stored procedures. The nested stored procedures are never called directly.

Design Requirements

Data Recovery

You must be able to recover data from the Inventory database if a storage failure occurs. You have a Recovery Time Objective (RTO) of 5 minutes.

You must be able to recover data from the Dev database if data is lost accidentally. You have a Recovery Point Objective (RPO) of one day.

Classification Changes

You plan to change the way customers are classified. The new classifications will have four levels based on the number of orders. Classifications may be removed or added in the future. Management requests that historical data be maintained for the previous classifications. Security A group of junior database administrators must be able to manage security for the Sales database. The junior database administrators will not have any other administrative rights.

A: Datum wants to track which users run each stored procedure.

Storage

ADatum has limited storage. Whenever possible, all storage space should be minimized for all databases and all backups.

Error Handling

There is currently no error handling code in any stored procedure.

You plan to log errors in called stored procedures and nested stored procedures. Nested stored procedures are never called directly.

You need to recommend a change to USP\_3 to ensure that the

procedure continues to execute even if one of the UPDATE statements fails. Which change should you recommend?

- A. Set the XACT\_ABORT option to off.
- B. Set the IMPLICIT\_TRANSACTIONS option to off.
- C. Set the XACT\_ABORT option to on.
- D. Set the IMPLICIT\_TRANSACTIONS option to on.

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

- Scenario: A stored procedure named USP\_3 is used to update prices. USP\_3 is composed of several UPDATE statements called in sequence from within a transaction. Currently, if one of the UPDATE statements fails, the stored procedure continues to execute.

- When SET XACT\_ABORT is OFF, in some cases only the Transact-SQL statement that raised the error is rolled back and the transaction continues processing.

### NEW QUESTION: 3

RMAN> BACKUP DATABASE PLUS ARCHIVELOG DELETE INPUT;

- A. Option C
- B. Option D
- C. Option B
- D. Option A

**Answer: C**

Explanation:

References:
