NEW QUESTION: 1

Scenario: A company is using Azure Log Analytics to monitor its servers. The company wants to ensure that the data is secure and that only authorized personnel can access it. The company is considering using Azure Sentinel for this purpose.

Question: Which of the following is a benefit of using Azure Sentinel for monitoring and security?

Azure

Sentinel is a cloud-native security solution that provides advanced threat protection, incident response, and security orchestration. It integrates with other Azure services and third-party security tools to provide a comprehensive security posture. Sentinel can detect and respond to threats in real-time, and it can help you investigate and remediate incidents. Sentinel also provides a central location for security alerts and logs, making it easier to manage and analyze security data.
