C\_LCNC\_01 latest exam engine and updated C\_LCNC\_01 from Business-First audio study guide will make you completely prepared for the SAP C\_LCNC\_01 video lectures as these products cover all the aspects of the course.

Actually, we have solved the problem long time ago, We help you to fulfill your dream and be the C\_LCNC\_01 certified in first attempt, We know your needs, and we will help you gain confidence to pass the SAP C\_LCNC\_01 exam.

#### **NEW QUESTION: 1**

You are planning the deployment of two new Always On Failover Cluster Instances (FCIs) of Microsoft SQL Server to a single Windows Server Cluster with three nodes. The planned configuration for the cluster is shown in the Server Layout

exhibit. (Click the Exhibit button.)

The SAN team has configured storage for the cluster and sent the configuration to you in the email shown in the SAN Team Email exhibit. (Click the Exhibit button.)

Each node of the cluster has identical local storage available as shown in the Local Storage exhibit. (Click the Exhibit button.)

All local storage is on SSD.

You need to plan specific configurations for the new cluster. For each of the following statement, select Yes if the statement is true. Otherwise, select No.

**Answer:**

Explanation:

Explanation

Box 1: Yes

tempdb on local storage. FCIs now support placement of tempdb on local non-shared storage, such as a local solid-state-drive, potentially offloading a significant amount of I/O from a shared SAN.

Prior to SQL Server 2012, FCIs required tempdb to be located on a symmetrical shared storage volume that failed over with other system databases.

Box 2: No

The VNN is set on the group level, not on the instance level. Database client applications can connect directly to a SQL Server instance network name, or they may connect to a virtual network name (VNN) that is bound to an availability group listener. The VNN abstracts the WSFC cluster and availability group topology, logically redirecting connection requests to the appropriate SQL Server instance and database replica. The logical topology of a representative AlwaysOn solution is illustrated in this diagram:

**NEW QUESTION: 2**

- A. Option B
- B. Option A
- C. Option D
- D. Option C

**Answer: A**

**NEW QUESTION: 3**

What is a primary concern of a CCO?

- A. Managing silos of information in different repositories
- B. Improving yield and increasing customer loyalty
- C. Managing data growth while reducing IT cost and complexity
- D. Compliance with regulatory requirements

**Answer: D**

**NEW QUESTION: 4**

HOTSPOT

Background

Contoso, Ltd. is a manufacturing company that serves the oil and gas industry. The company produces materials and chemicals that are used in the production of gasoline. Contoso has recently acquired several smaller companies including A Datum, Litware, Inc., and Northwind Traders. Contoso has now grown from a local company to a company that has offices in multiple geographies.

The company has the following offices:

Corporate structure

Contoso is divided into business units on their function primarily, and then by geographic region. The corporate language is English. Contoso has a major datacenter that is located near their Dallas facilities. A.

Datum Corporation has a contract with a third-party datacenter in London, England. Contoso intends to move their environment fully to the cloud in the future, and will use SQL Databases in the cloud for business continuity.

Contoso has, up until recently, handled all collaboration between employees using a single file share, email, USB flash drives, and local storage. With a growing need for global cooperation and collaboration, Contoso has elected to implement a SharePoint environment. You must minimize the costs for the solution.

Business requirements

SharePoint

SharePoint environment

Each business functional group requires a unique site collection. You must create child site collections

for each geographical region that is of a business functional group.

The SharePoint taxonomy must follow the corporate structure.

All existing corporate content must be migrated to the new SharePoint 2016 environment.

The SharePoint environment must be accessible to all employees 24 hours a day, 7 days a week, and

365 days a year.

Data

You must retain all records for compliance reasons.

You must share sales data by using Microsoft Excel. The sales data must be available online.

The Beijing office must be able to share information to external partners.

Employees

Employee requirements

Employees must only use SharePoint Designer to edit SharePoint pages.

Employees must be able to edit Excel workbooks in a browser.

Employees must have access to PowerPivot.

Editing of SharePoint pages

Contoso has decided that they will allow employees to edit SharePoint 2016 pages only by using SharePoint Designer.

Employees must edit pages in a development environment that is located in Dallas.

Changes must be applied to the production environment by using a backup/restore operation on the individual site collection.

The development environment is an exact replica of the production environment.

Technical requirements

SharePoint requirements

You identify the following requirements for the SharePoint environment:

Backup and disaster recovery

The environment must be backed up at all times. You must not permit the loss of more than one hour of

data.

In the event of a disaster, the SharePoint environment must remain accessible to all employees. All

disaster response and recovery plans and protocols will be available from the corporate SharePoint instance. The maximum acceptable downtime for the environment is four hours.

In the case of failure, you must be able to restore the environment to any point within three weeks

before the failure.

SharePoint farm

You must ensure that specific offices can share content with external partners.

You must log activities related to PowerPivot in the SharePoint usage logs.

You must implement Search services from the on-premises farm.

#### Deployment guidelines

You have the following guidelines and protocols for implementing the SharePoint environment:

You must install and configure all servers in an identical way.

You must provision all site collections by using the SPSite.Copy method at the content database level.

You must use reproducible and traceable methods to provision sites.

You must track information about SharePoint installations in Active Directory Domain Services.

You must specify different service accounts for each service application.

Users in the Dallas test environment must be able to create content databases on demand.

#### Planned environments

You plan to implement the following environments:

##### Groups and accounts

You must create the following groups:

You must create the following service accounts:

##### Monitoring and management

You must implement monitoring for the following aspects of the SharePoint solution:

###### Security

You must be notified if administrator accounts are used to run application pools or if the server farm account is used for other services.

###### Performance

You must monitor database index fragmentation and whether the paging file size is sufficient.

###### Availability

You must monitor free space on drives and receive an alert if a drive is running out of space. You must also be notified if one or more servers are not responding.

###### SharePoint page performance

You must monitor the manufacturing, trading, and finance instances in Beijing for the any performance issues. You must also log attempts to connect to the instances from locations outside of the corporate network.

Connectivity between Office 365 and the on-premises SharePoint 2016 environment You must monitor connectivity between the two environments.

Contoso is concerned that unauthorized users may gain access to

sensitive information. You must log any attempts to access sensitive information. The company is especially interested in the logging the following actions:  
attempts to open documents that contain personal information  
editing sensitive documents

printing sensitive documents

You need to create the managed paths for all site collections. For each site collection, which inclusion type should you use? To answer, select the appropriate inclusion type from each list in the answer area.
