NEW QUESTION: 1
Which Juniper product is designed to generate threat containment data and continuously monitor network traffic for security threat activity?
A. AppFormix
B. Cyphort
C. Policy Enforcer

D. Network Director
Answer: B

NEW QUESTION: 2
iSCSI networks are just as secure as Fiber SAN? (True or False)
A. True
B. False
Answer: B
Explanation:
NO - Inherently, Fibre Channel SANs have an added security
advantage over iSCSI SANs because they are based on a
physically isolated fabric.

NEW QUESTION: 3
Note: This question is part of a series of questions that use
the same or similar answer choices. An Answer choice may be
correct for more than one question in the series. Each question
independent of the other questions in this series. Information
and details provided in a question apply only to that question.
You are a database developer for a company. The company has a
server that has multiple physical disks. The disks are not part
of a RAID array. The server hosts three Microsoft SQL Server
instances. There are many SQL jobs that run during off-peak
hours.
You must monitor and optimize the SQL Server to maximize
throughput, response time, and overall SQL performance.
You need to identify previous situations where a modification
has prevented queries from selecting data in tables.
What should you do?
A. Create a Performance Monitor Data Collector Set.
B. Create an Extended Event.
C. Create a sys.dm_os_wait_stats query.
D. Create a sys.dm_os_waiting_tasks query.
Answer: C

NEW QUESTION: 4
Active-Passive mode, also called standby mode, i.e., at any
time only one of the two controllers in the controller is
activated, as the main controller, the application server for
processing I / O requests, and additional control is idle, as a
backup controller to the host controller fails to take over its
work in a timely manner or offline.
A. True
B. False
Answer: A
