Answer: A,C

NEW QUESTION: 2
A technician needs to implement a system which will properly authenticate users by their username and password only when the users are logging in from a computer in the office building. Any attempt to authenticate from a location other than the office building should be rejected. Which of the following MUST the technician implement?
A. Single factor authentication
B. Transitive authentication
C. Biometric authentication
D. Dual factor authentication
Answer: A

NEW QUESTION: 3
You work as a Project Manager for Tech Perfect Inc. Several projects are running under your supervision.
Martha, a team leader of a project, informs you about the performance indexes of her project. The schedule performance index (SPI) of her project is 0.835. What does this figure indicate?
A. The schedule performance is better than expected.
B. The schedule performance is right on target.
C. The schedule performance is below expectation.
D. The cost performance is better than expected.
Answer: C
Explanation:
Explanation/Reference:
Explanation:
According to the question, the SPI of Martha's project is 0.835. This figure is less than 1. Hence, it shows that the schedule performance is below expectation. What is SPI?
Schedule performance index (SPI) is the measure of schedule efficiency on a project. It is used in trend analysis to predict future performance.
SPI is the ratio of earned value to planned value. The SPI is calculated based on the following formula: SPI
= Earned Value (EV) / Planned Value (PV) If the SPI value is greater than 1, it indicates better than expected performance, whereas if the value is less than 1, it shows poor performance. The SPI value of 1 indicates that the project is right on target.
Incorrect Answers:
A, B: An SPI value of 1 or above indicates that the schedule performance is either right on target or better than expected.
C: SPI has nothing to do with cost performance.
