Answer:

Explanation:

NEW QUESTION: 2

Which three components can a Citrix audit within Provisioning Services? (Choose three.)

- A. Provisioning Services servers
- B. Stores
- C. Target Devices
- D. Delegated Administrator Groups
- E. Provisioning Services database

Answer: A,B,C

NEW QUESTION: 3

- A. Option B
- B. Option C
- C. Option D
- D. Option A

Answer: C

Explanation:

Explanation

In this question, we need to redirect users to the SharePoint public website by using a root domain, Contoso.com. If we were using `www.contoso.com`, we could simply configure a CNAME record in DNS.

However, this question states that "You need to configure Office 365 to redirect the website requests without affecting the company's email or IM". Email uses MX records. If you have a CNAME record at the root level of a domain, the MX records will not work.

To use a root domain, we need to configure a redirect. First we need to add a subdomain such as `www.contoso.com` in the Office 365 admin center then configure the redirect to the subdomain.

"If you want users to see your site when they type just the root domain, `contoso.com`, contact your DNS hosting provider and ask if they have a URL redirection service to direct traffic from `contoso.com` to `www.contoso.com`. Most providers offer URL redirection, and you can check their documentation to learn how to set it up." References:
