NEW QUESTION: 1
A company need to deploy outdoor WLAN, the choice of AP equipment for Huawei outdoor AP6510DN. In order to save costs, the engineers plan to directly AP power supply via AC6605, AC6605 only installed a 500W PoE power supply module, AC6605 normal work requires 120W power, then AC6605 can power supply for how many AP6510DN?
A. 0
B. 1
C. 2
D. 3
Answer: B

NEW QUESTION: 2
You have a computer that runs Windows 7.
The network contains a monitoring server named server1. The computer runs a monitoring service named
Service1. Service1 uses Remote Procedure Calls (RPCs).
You need to ensure that Service1 can receive requests from
Server1.
What should you do?

A. From windows Firewall with Advanced Security, create a predefined rule.
B. From windows Firewall with Advanced Security, create a custom rule.
C. From the Network and Sharing Center, modify the network location settings.
D. From the Network and Sharing Center, modify the advanced sharing settings.
Answer: B
Explanation:
Creating WFAS Rules
The process for configuring inbound rules and outbound rules is essentially the same: In the WFAS console, select the node that represents the type of rule that you want to create and then click New Rule. This opens the New Inbound (or Outbound) Rule Wizard. The first page, allows you to specify the type of rule that you are going to create. You can select between a program, port, predefined, or custom rule. The program and predefined rules are similar to what you can create using Windows Firewall. A custom rule allows you to configure a rule based on criteria not covered by any of the other options. You would create a custom rule if you wanted a rule that applied to a particular service rather than a program or port. You can also use a custom rule if you want to create a rule that involves both a specific program and a set of ports. For example, if you wanted to allow communication to a specific program on a certain port but not other ports, you would create a custom rule.

NEW QUESTION: 3
Your customer wants to acquire HPE OneView Advanced licenses for servers they plan to purchase in the future. They would like a pay-as -you-go approach in which they only pay for the licenses as they are used. Which HPE licensing feature addresses this customer's request?
A. Tracking license
B. Activation Key Agreement
C. GNU license
D. iLO Advanced
Answer: A
