### **NEW QUESTION: 3**

You need to recommend a solution for the planned changes to the customer classifications.

What should you recommend? (Each correct answer presents part of the solution. Choose all that apply.)

- A.** Add columns for each classification to the Customers table.
- B.** Add a table to track any changes made to the classification of each customer.
- C.** Implement change data capture.
- D.** Add a row to the Customers table each time a classification changes.
- E.** Add a column to the Classifications table to track the status of each classification.

**Answer: B,E**

Explanation:

\* Scenario: You plan to change the way customers are classified. The new classifications will have four levels based on the number of orders. Classifications may be removed or added in the future.

Incorrect:

Not E: Change data capture provides information about DML changes on a table and a database. By using change data capture, you eliminate expensive techniques such as user triggers, timestamp columns, and join queries.
