Now I am going to introduce you the PDF version of LookML-Developer test braindumps which are very convenient, The LookML-Developer certification exam training tools contains the latest studied materials of the exam supplied by IT experts.

NEW QUESTION: 1

What is the purpose of the nsswitch.conf file?

- A.** It is used to configure network protocol port numbers such as for HTTP or SMTP.
- B.** It is used to configure where the C library looks for system information such as host names and user passwords.
- C.** It is used to configure which network services will be turned on during the next system boot.
- D.** It is used to configure LDAP authentication services for the

local system.

Answer: B

NEW QUESTION: 2

You work as a Database Administrator for DataOneWorld Inc. Management instructs you to remove an object from the relational database management system. Which of the following statements will you use to accomplish the task?

- A. CREATE
- B. ALTER
- C. SELECT
- D. DROP

Answer: D

Explanation:

The DROP statement in SQL is used to remove an object from an RDBMS. The types of objects that can be dropped depend on which RDBMS is being used, but most support the dropping of tables, users, and databases. The syntax of the DROP TABLE statement is as follows:

```
DROP TABLE "table_name"
```

Answer C is incorrect. The CREATE statement is used to make a new database, table, index, or stored query. The CREATE statement in SQL creates an object inside DBMS.

The types of objects that can be created depend on which DBMS is being used, but most support the creation of tables, indexes, users, and databases.

Answer D is incorrect. The ALTER statement in SQL changes the properties of an object inside DBMS. The types of objects that can be altered depend on which DBMS is being used. The syntax of the ALTER statement is as follows:

```
ALTER <specification> [Specification name]
```

Answer B is incorrect. The SELECT statement is used to select data from a database. The result is stored in a result table called the result-set. The SELECT statement retrieves zero or more rows from one or more base tables, temporary tables, or views in a database.

NEW QUESTION: 3

Which three of the following statements about rate tables are true?

- A. They have effective dates
- B. They store values that can vary over time
- C. They cannot be used by rule sets
- D. They store application properties
- E. They store values for drop-down lists
- F. They can be cloned

Answer: A,B,F
