**NEW QUESTION: 1**

- A. Option B
- B. Option A
- C. Option C
- D. Option D

**Answer: B**

Explanation:

\* Scenario: / During your investigation, you discover that the sales force reports are causing significant contention. /Sales

force data access Sales people at both the headquarters office and the satellite office must generate reports that read from the Product and SalesOrderDetail tables. No updates or inserts are ever made by sales people. These reports are run at random times and there can be no reporting downtime to refresh the data set except during the monthly maintenance window. The reports that run from the satellite office are process intensive queries with large data sets. Regardless of which office runs a sales force report, the SalesOrderDetail table should only return valid, committed order data; any orders not yet committed should be ignored.

**NEW QUESTION: 2**

Visual Studio App Center is a cloud service that provides a central location for managing and distributing mobile applications. It also provides a platform for monitoring application performance and crashes. In order to use App Center, you need to opt in to the service(s) that you want to use, meaning by default no services are started and you will have to explicitly call each of them when starting the SDK. Insert the following line to start the SDK in your app's AppDelegate class in the didFinishLaunchingWithOptions method. MSAppCenter.start("{Your App Secret}", withServices: [MSAnalytics.self, MSCrashes.self])
